## Science 9: Mitosis Poster

### Instructions

1. Cut out the cells.
2. Arrange them in a circle so that the parent cell divides and forms into two new, identical cells.
3. Tape each cell on to the paper. **Do not write anything until Ms. Hayduk has checked your layout!** (2 marks)
4. Draw arrows between each stage. (1 mark)
5. Write the **name** of each stage. (6 marks)
6. Write one sentence next to each arrow explaining what is happening. (6 marks)
